

INTERNATIONAL AUDI MELGES 20 CLASS ASSOCIATION
RULE SUPPLEMENT / CLARIFICATION
2014 May 03

Application of Non Skid Material on the cockpit floor - Rule C7.1.c:

"Non skid material of any kind may be added to the cockpit floor, foot pushes, keel sump cover, deck and motor hatch only. Thickness shall not exceed 6mm."

For the "*Non-Skid-Material*" to apply well, it may be necessary to sand the surface a little bit. You can do it lightly, just to remove the nonskid bumps.

- **Egidio Babbi**, International Audi Melges 20 Class Association Chief Measurer
